

131 Series Sliding Window

POSSIBLE CONFIGURATIONS

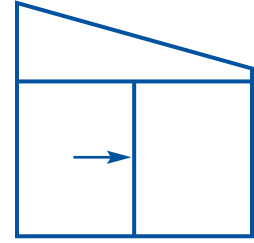

With Semi-Circle Head

With Split Semi-Circle Head

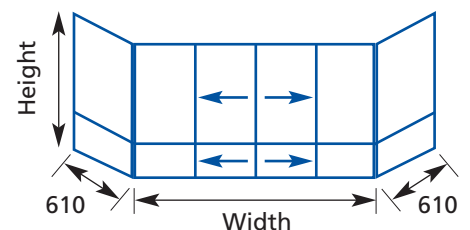

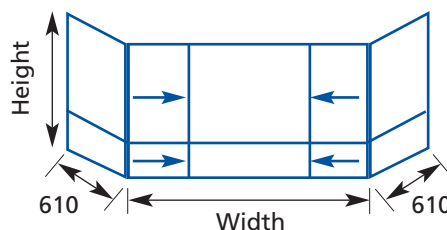

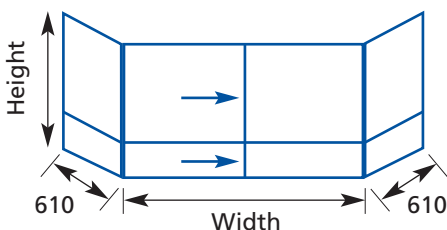

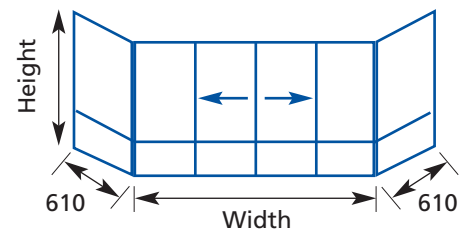

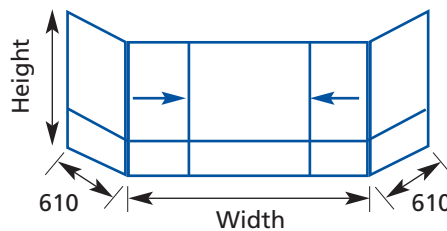

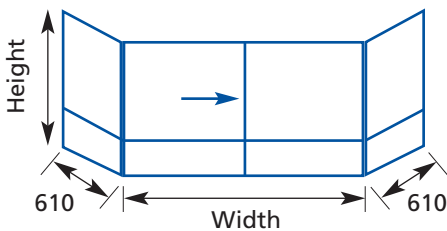

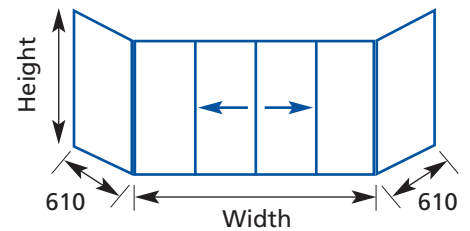

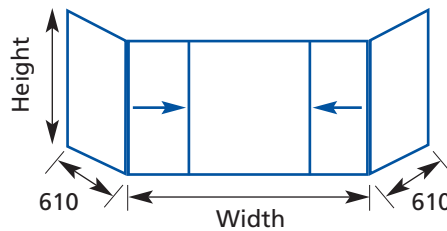

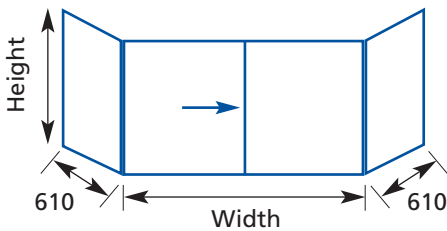

With Raked Head

131 Series Bay Windows

POSSIBLE CONFIGURATIONS

Note:

- All dimensions stated are in millimetres
- When ordering, always state the height dimension first
- All configurations are viewed from the outside looking inside
- Standard height and width dimensions are as per the 131 Series sliding window and window wall size range
- Bay window configurations illustrated above show a 135° angle, 90° available upon request.
- Drawings may not be to scale
- The availability of certain sizes and configurations are dependent on the design wind load requirement of the site. Check with your G. James Representative to confirm availability.
- Available on request (additional charges apply):
 - Finger joint pine reveals (clear pine, meranti, LOSP treated, primed and Tasmanian oak available upon request). When ordering state the width of reveal required.
 - Security, acoustic and energy efficient upgrades
 - Non-standard sizes
 - Colonial or federation style bars
