DECRALITE

DECRALITE »

Decralite combines the latest in two-pack acrylic urethane paint with the smooth, durable, easy-to-clean surface of glass to offer a stylish, practical alternative to tiling. Free of unsightly grout joints that attract dirt and mould, Decralite is your ideal choice for kitchen and bathroom splashbacks, shower cubicle wall panels or any other interior application you desire.

Features:

- A smooth, easy-to-clean, durable glass surface.
- An extensive selection of colours including metallics.
- A sheer, seamless finish with no exposed or visible fixings.
- No unsightly grout joints.

» With an extensive selection of colours, including a range of spectacular metallic paints from which to choose, Decralite can be used to compliment or contrast any kitchen or bathroom décor. Your chosen colour is applied to either clear or ultra clear (low iron) glass depending on the effect required.

Each Decralite panel is processed to suit individual designs and applications. The sheer, seamless finish is created by adhering the painted surface to the wall, and avoiding the need for exposed or visible fixings.

G.James welcomes your inquiry on how Decralite can feature in your home.
